

Project Blueprint

This document outlines the user flows for the core application.

Phase 1: The Fitness Journey (The Participant's Core App)

This phase focuses on the primary user's (the "Participant's") personal fitness experience.

1. User Flow: Onboarding & Personalization

Goal: To make the user feel understood from the first tap and to gather the essential data needed for the AI Chatbot and Personalized Feed.

Steps:

1. **Welcome Screen:** A clean, elegant screen with the app logo and a single call-to-action: "Begin Your Journey."
2. **Account Creation:** Standard, simple sign-up (Email, Google, Apple).
3. **Personalization Quiz:**
 - o **Primary Goal:** (e.g., Lose Weight, Build Muscle, Improve Wellness).

- **User Stats:** (e.g., Age, Weight, Height) for the chatbot's "Personalization Memory".
 - **Interests & Experience:** (e.g., Tags like "Yoga," "Bodybuilding," "Running") to feed the content algorithm.
4. **Permissions:** Clear, transparent requests for:
 - Notifications (For workout/meal reminders).
 - Camera (For AI-powered form correction).
 - Data Consent (For personalized feed).
 5. **Completion:** A reassuring message: "Your personalized plan is being created." The user is then directed to the Home Feed.

2. User Flow: Home Feed (Personalized Dashboard)

Goal: To act as the "community" hub, driven by the "Personalized Content Algorithm".

Steps:

1. **Landing:** The user lands on the main "Feed" tab.
2. **The Feed:** The user sees a vertical feed of posts, ranked by the AI-driven algorithm (not chronological).
3. **Content Mix:** The user sees posts from Trainers/Gyms they follow, other Participants, and content matching their interests.
4. **User Interaction:**
 - **Consume:** The user scrolls, views text and images.

- **Engage:** They can leave reactions (like, love, support) and comments.
- **Post:** The user can tap a "+" icon to create their own public post (text and image only for MVP).

3. User Flow: AI Chatbot (Core AI Experience)

Goal: To position the chatbot as an all-in-one AI partner, seamlessly integrating planning and analysis.

Sub-Flow A: Conversational Planning

1. **Initiate:** User taps the "Chatbot" icon.
2. **Query:** User types a natural language question (e.g., "I'm tired, should I skip my leg workout?").
3. **Personalized Response:** AI uses "Personalization Memory" to give a genuine suggestion.
4. **Action:** User asks, "Okay, can you create a new workout plan for me for next week?"
5. **Integration:** The AI generates the plan and asks, "Would you like me to add this to your schedule?"
6. **Sync:** User confirms, and the AI automatically populates the "Schedule" feature.

Sub-Flow B: Computer Vision Form Correction

1. **Context:** The user starts an exercise from their "Schedule" tab.
2. **Activate:** Inside the exercise, they tap "Check My Form."
3. **Permission:** The app confirms camera use.

4. **Capture:** The user performs the exercise, and the app captures the movement.
5. **Analysis:** The AI uses computer vision models to analyze posture and form.
6. **Feedback:** After the set, the chatbot provides feedback (e.g., "Your depth was great, but try to keep your chest from falling forward").

4. User Flow: Workout Scheduler

Goal: To be the user's single source of truth for their fitness plan, fully integrated with the AI.

Steps:

1. **View:** The user navigates to the "Schedule" tab.
2. **Display:** They see a clear table view (Sun-Sat) showing their workout plan, populated by the AI.
3. **Manual Edit:** The user taps a day to manually add a "Target Calorie" goal.
4. **Set Alarms:** They also set a "Workout Alarm" for 7:00 PM and a "Meal Reminder."
5. **Notifications:** At 7:00 PM, the user receives a push notification to start their workout.

5. User Flow: E-commerce (Fit Store)

Goal: To create an integrated, high-end, and personalized retail experience.

Steps:

1. **Discover:** The user navigates to the "Fit Store" tab.
2. **Personalized Browsing:** The user sees a section for "AI-based Recommendations".
3. **Search & Filter:** The user searches for products and filters by "Brand" and "Rating".
4. **Product Details:** The page shows high-quality images, descriptions, and verified reviews from buyers.
5. **Cart & Checkout:**
 - User adds items to a persistent cart.
 - They see a clear "Order Summary" and pay with an integrated gateway (Apple Pay, Google Pay, etc.).
6. **Post-Purchase:**
 - Instant in-app and email order confirmation.
 - The user can check the "My Orders" section for "Order Tracking" status.

Phase 2: The Community & Marketplace

This phase focuses on bringing the Gym Owners and Trainers into the ecosystem and allowing Participants to find and book them.

1. User Flow: Trainer Onboarding & Management

Goal: To create a simple, trusted verification process for trainers and give them the tools to build their business.

Steps:

1. **Sign-Up:** A user signs up as a "Participant" first.
2. **Apply to be Trainer:** In their profile, they tap "Become a Trainer."
3. **Verification:** They submit a form with their certifications and credentials and fill out their profile (bio, specialization, pricing).
4. **Admin Approval:** The application is sent to the Admin dashboard for review and approval.
5. **Create a Bundle:** The verified trainer goes to their "Trainer Hub" and creates a "4-week Strength Program" bundle (title, description, price, pre-recorded videos).
6. **Create a Session:** They also create a "Live Group Yoga" session (title, date, duration, price, participant capacity).
7. **View Bookings:** The trainer can see a list of participants who have booked their sessions.

2. User Flow: Gym Owner Onboarding & Management

Goal: To get verified gyms onto the platform and empower them to manage their presence, staff, and membership offerings.

Steps:

1. **Apply to be Owner:** The user applies from their "Participant" profile by tapping "Register Your Gym."
2. **Verification:** They submit ownership documents (e.g., business license) to the Admin for approval.
3. **Create Profile:** Once approved, the Gym Owner creates their gym profile (images, amenities, pricing) and sets their pin on the map.
4. **Manage Staff:** The Owner goes to their "Gym Hub" and:
 - Adds "Trainers" to the "About Page".
 - Assigns "Moderator" status to employees (who can now also post and manage bundles).
5. **Manage Services:**
 - **Bundles:** Creates a "Monthly Membership" bundle.
 - **Sessions:** Creates a "Crossfit Class" session, assigns it to a fixed room, and sets a participant limit.
 - **Promos:** Creates a 10% discount promo code with an expiration date.

3. User Flow: Participant (Booking & Interaction)

Goal: For the Participant to seamlessly discover, book, and communicate with both Trainers and Gyms.

Steps:

1. **Discover Gym:**

- The Participant goes to the "Explore" tab (map view).
- They switch to "List View" and filter by "Rating" and "Amenities."
- They view a gym's full profile, including photos and verified reviews.

2. **Discover Trainer:**

- They go to the "Trainers" tab to browse profiles, specializations, and ratings.

3. **Book & Pay:**

- The user books the "4-week Strength Program" bundle from the trainer.
- Payment is processed immediately to confirm the booking.

4. **Chat & Feedback:**

- After booking, the Participant can start a 1-to-1 chat with the Trainer.
- After the session, the Participant leaves a star rating and text review (not anonymous).

5. **Engage with Gym:**

- The Participant sees a "Text Post" from a Gym in their Home Feed and engages with it.
- They also initiate a direct 1-to-1 chat with the Gym Owner to ask questions.
